

Catch Basin Separation & Drainage Improvements August 2015

As part of the City's ongoing work focused on mitigating CSO discharges, the Department of Utilities has identified storm drainage catch basins requiring work to fully disconnect them from the sanitary sewer system. Contract 14-045 is the third catch basin separation project performed by the City since 2007 as part of the CSO long-term control plan. The scope of work includes resealing and abandoning existing catch basins, replacing or installing new drain piping and restoration of roads and sidewalks as required. Work was completed in 2015.

Following are the catch basin locations where work was completed:

1. CB-043-69: Intersection of Cypress Street and Second Street; Southwest Corner
2. CB-044-76: Cypress Street; Northern Curb at Intersection with Third Street
3. CB-045-11: Albro Street and Van Zandt Avenue; Side of 117 Van Zandt Avenue
