

Wellington Avenue & Thames Street Sewer Rehabilitation Projects Public Informational Meeting

The City of Newport is in the process of designing critical improvements to the Wellington Avenue and Thames Street sanitary sewer interceptors. We understand that the residents and businesses along these two streets will be affected by these improvement projects and would like to invite all interested parties to learn more about the project status. This will be the third in a series of public meetings to share project information and to gather input from interested parties. The focus of this meeting will be to review the 60 % design documents and traffic control options for Thames St. and planned construction for Wellington Ave just prior to bid advertisement. Details about the third in this series of public meetings are below. We look forward to working with you to deliver a successful project to our community.

- *Julia Forgue, P.E., Director of Utilities*

Date: Wednesday, May 26, 2010

Location: City Hall Council Chambers
2nd Floor
43 Broadway
Newport, RI 02840

Time: 8:30 AM

Topics to be addressed at this meeting include:

- Results of Survey from 1st Public Information Meeting
- Thames Street Rehabilitation Project
 - Recommended rehabilitation technology
 - Mitigation measures included in specifications (sewer service, odor, noise, traffic...)
 - Vehicular & Pedestrian Traffic Control measures
- Wellington Avenue Replacement Project
 - Status of current design
 - Bid, award and construction schedule review
- Communications during construction

The workshop will also be accessible by means of video conferencing in the Assembly Room of the Newport Police Station, 120 Broadway which meets ADA requirements. Individuals requiring interpreter services for the hearing impaired must notify the Department of Utilities at 845-5600 forty-eight hours in advance of the workshop.
