

Water Distribution Main System Improvements 2014 - Contract 15-008

The City of Newport Water Division, as part of its ongoing infrastructure replacement program to continue to provide high quality drinking water to the customers of the Newport Water System, has identified undersized and/or antiquated water mains in 13 streets throughout the City of Newport to be replaced in Construction Contract 15-008.

The scope of work includes the replacement of existing water mains with new 8 inch and 6 inch mains, the installation of new services up to and including the curb stops, replacing existing hydrants, and trench restoration at the disturbed areas. Work on the water main improvements will begin Fall 2014.

A contract in the amount of \$2,193,792.00 was awarded to C.B. Utility Company, in August, 2014 for the project. The water main improvement project is part of the Capital Improvement Program and funding is included in the current water rates.

The water mains in the following streets will be replaced during this project:
